

GRANT DAVIS

Costa Mesa, CA | (775) 846-0702 | grantmonroedavis@gmail.com | LinkedIn | Portfolio | GitHub

SUMMARY

Computer Science & Engineering graduate and Customer Support Consultant with 2+ years of experience investigating complex software and data issues, reproducing defects, testing fixes, and coordinating across Product, Platform, Development, and customer-facing teams. Built game and VR projects in Unity/C# and has competed at high levels in VALORANT, Overwatch, Marvel Rivals, and Apex Legends.

GAME DEVELOPMENT PROJECTS

Card Mage - Senior Capstone Project

2023

Unity | C# | Team Project | GitHub

- Designed and implemented enemy behaviors, a multi-phase boss, and level-based difficulty scaling, iterating on mechanics and tuning through playtesting and team feedback.
- Contributed to shops, combat feedback, audio, and visual polish while diagnosing hit-registration, projectile, and enemy-behavior issues.

Break Room - VR Project

2023

Unity | Oculus Quest 2 | Four-person Team | GitHub

- Collaborated on a four-person team to build an Oculus Quest 2 VR experience with teleportation, object interaction, destruction, objectives, and scene transitions.
- Adapted interaction and destruction mechanics through team iteration when initial approaches exceeded the project's technical scope.

PROFESSIONAL EXPERIENCE

Phocas Software - Customer Support Consultant

Jan 2026-Present

Graduate Customer Support Consultant | Jan 2024-Jan 2026

- Own complex customer issues from investigation through resolution, tracing failures across application behavior, customer data, databases, integrations, scripts, schedules, hosted infrastructure, and external systems such as ERPs.
- Use SQL daily to investigate data discrepancies, validate application behavior, isolate root causes, and implement customer fixes using joins, CTEs, casting, filtering, restrictions, and data-source logic.
- Reproduce suspected defects in cloned or controlled environments, gather logs and reproduction steps, test private builds and fixes, document findings, and provide workarounds while permanent solutions are developed.
- Translate ambiguous customer reports into defined technical problems through calls, email, and screen sharing, then coordinate investigation and resolution across Product, Platform, Development, Activations, Account Management, Customer Success, and global support teams.
- Resolved 2,500+ customer cases since joining Phocas while meeting SLA expectations; regularly assist teammates with diagnosis, troubleshooting paths, and next steps.

Chick-fil-A - Trainer / Team Member

May 2022-Jan 2024

Reno, NV

- Promoted from Team Member to Trainer while attending college; trained teammates and worked across all back-of-house positions with additional front-of-house support.

COMPETITIVE GAMING & ESPORTS

VALORANT - Immortal peak | **Overwatch** - Top 500 across roles

Marvel Rivals - Eternity peak | **Apex Legends** - Masters

University of Nevada, Reno Esports | 2018-2023

Competed on collegiate Overwatch, Apex Legends, and VALORANT teams.

EDUCATION

University of Nevada, Reno - B.S. in Computer Science & Engineering

May 2023

Selected Coursework: Software Engineering, Data Structures, Analysis of Algorithms, Probability & Statistics

TECHNICAL SKILLS

Programming: SQL (daily professional use); project/coursework experience with C++, C#, Python, C, R, and MATLAB

Web: HTML, CSS | Development/Tools: Unity, Git/GitHub, Jira

Scripting: PowerShell, Bash (read/modify existing scripts) | Technical: database querying, log analysis, APIs/integrations, debugging
